DETAILED ACTION

1. This Office Action is responsive to the following communication: Original Application filed on 23 January 2004.
2. Claims 1-27 are pending and present for examination. Claims 1, 10, and 19 are independent.

Information Disclosure Statement

3. The information disclosure statement (IDS) submitted on 11 February 2004 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Drawings

4. The drawings were received on 23 January 2004. These drawings are accepted.

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. **Claims 1-8, 10-17 and 19-26** are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims are directed toward a method/apparatus/article of manufacture for "optimizing a query" and are non-statutory because they do not provide a useful result.

The claims as recited fail to establish a prima facie case that the claimed invention as a whole produces a useful result. The aforementioned claims make no mention of the usefulness of "pulling out the transitively closed predicate from the correlated subquery to a parent query block of the query." See *State Street*, 149 F.3d at 1373, 47 USPQ2d at 1601-02. MPEP 2106. "The claimed invention as a whole

must accomplish a practical application. That is, it must produce a 'useful, concrete and tangible result' '' (emphasis added).

Allowable Subject Matter

7. , **Claims 9, 18, and 27** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
